

Enterasys S-Series™

Terabit-class, Convergence-ready, Modular Switch for Edge-to-Core and Data Center Deployments

Product Overview

The Enterasys S-Series family of flow-based switches brings high performance distributed switching to the network access layer, distribution layer, enterprise/campus core, and data center. The S-Series family consists of the 8-slot S8, 6-slot S6, 4-slot S4, 3-slot S3, 1-slot S1A chassis and the fixed configuration S-Series Stand Alone (SSA). The S-Series delivers some of the highest switching port densities per rack unit available in the market and is future-proofed and scalable to provide overall system capacities of up to nine and a half Terabits. All chassis support 802.3af and 802.3at (high power) standards-based PoE via an integrated or field installable power system. There are a variety of I/O modules designed and optimized for deployment at the network access layer, distribution layer, network core and data center that provide a broad array of connectivity options for copper and fiber cabling infrastructures.

The S-Series provides a highly resilient distributed switching and routing architecture with management and control functions embedded in each module, delivering unsurpassed reliability, scalability, and fault tolerance. Organizations can cost-effectively add connectivity as needed while scaling performance capacity with each new module. The highly available architecture makes forwarding decisions, and enforces security policies and roles while classifying/prioritizing traffic at wire speed. All I/O modules provide the highest Quality of Service (QoS) features for critical datacenter and campus applications such as voice and HD video even during periods of high network traffic load while also proactively preventing Denial of Service (DoS) attacks and malware propagation.

The S-Series implements our custom packet processor technology, CoreFlow2, which provides an industry-leading, flow-based switching architecture to intelligently manage individual user and application conversations—far beyond the capabilities of switches that are limited to using VLANs, ACLs, and ports to implement role-based access controls. Users are identified and roles are applied to ensure each individual user can access their business-critical applications no matter where they connect to the network.

S-Series policy rules combined with deep packet inspection can intelligently identify and automatically respond to security threats while improving reliability and quality of the user experience.

A significant differentiator for the S-Series is the ability to collect NetFlow data at wire-speed on every port, providing total visibility into network resource consumption for users and applications. The S-Series is the only enterprise switch to support multi-user, multi-method authentication on every port - absolutely essential when you have devices such as IP phones, computers, printers, copiers, security cameras, badge readers, and virtual machines connected to the network. When quality of service, device and application prioritization and security matters, there is no better choice than the Enterasys S-Series.

Enterasys S-Series Highlights

Terabit-class performance with granular traffic visibility and control

Automated network provisioning for virtualized, cloud, and converged voice/video/data environments

High availability redundancy features including self-healing, maximizes business continuity for critical applications

Versatile high density solution with highly flexible connectivity and power options reduces cost of ownership

Built-in hardware support for 40Gb and 100 Gbps Ethernet, emerging protocols (IPv6) and large scale deployment protocols (MPLS)

Greater than 9.5 Tbps backplane capacity with 2.56 Tbps switching capacity and 1920 Mpps throughput

There is nothing more important than our customers.

Forwarding Paradigm

The Enterasys S-Series chassis utilize both fabric-based point-to-point and fabric-less meshed forwarding architectures. The S1A, S4, S6, and S8 chassis use a fabric-based forwarding architecture that provides multiple high bandwidth data paths between I/O modules, while the S3 chassis provides a high performance, fabric-less meshed forwarding architecture ideally suited for highly available network edge wiring closet deployments. All chassis are optimized for redundant high performance switching and routing as well as providing flexible connectivity and the ability to add features and scale performance as required and as new technologies become available.

I/O fabric modules provide scalable, high performance data paths as well as a full complement of front panel interfaces with flexible modular interface options. A single I/O fabric may be used in either an S1A, S4, S6, or an S8 chassis, however, the use of two I/O fabrics creates a load sharing fabric pair that provides up to 2560 Gbps switching capacity and adds high-availability features. The S8 and S6 chassis augments the load sharing fabric pair by allowing the addition of a third I/O fabric module, increasing the system reliability and performance in the unlikely event of an I/O fabric failure. An S8 or S6 system with two I/O fabrics installed will gracefully reduce the fabric switching capacity by 50 percent, in the event of an I/O fabric failure, however, when a third I/O fabric is installed, the system will maintain a full 2560 Gbps of switching performance. The load sharing fabric architecture ensures the highest availability and performance for the most demanding and mission-critical networks.

Performance and Port Density Specification

	SSA130	SSA150	SSA180	S1	S3	S4	S6	S8
Chassis Slots				1	3	4	6	8
System Switching Capacity	40 Gbps	120 Gbps	120 Gbps	320 Gbps	360 Gbps	1.28 Tbps	1.92 Tbps	2.56 Tbps
System Switching Throughput	30 Mpps	90 Mpps	90 Mpps	240 Mpps	360 Mpps	960 Mpps	1440 Mpps	1920 Mpps
Total Backplane Capacity				320 Gbps	525 Gbps	3 Tbps	7 Tbps	9.5 Tbps
Maximum 10/100/1000 Base-TX Class 3 PoE or 1000Base-X SFP (MGBIC) ports per system	48	48	48 (No PoE)	72	216	288	432	576
Maximum 10GBase-X SFP+ ports per system	4	4	4	24	96	112	168	232
Maximum 40GBase-X QSFP+ ports per system				6		24	36	48

I/O Module Specification

S130 Class Modules			S140 I/O Modules				S180 I/O Modules

Distributed, Flow-Based Architecture

In order to ensure granular visibility and manage traffic without sacrificing performance, the Enterasys S-Series implements our CoreFlow2 distributed, flow-based architecture. This architecture ensures that when a specific communications flow is being established between two end points, the first packets in that communication are processed through the multilayer classification engines in the switch I/O modules and I/O fabric modules. In this process, the role is identified, the applicable policies are determined, the packets are inspected, and the action is determined. After the flow is identified, all subsequent packets associated with that flow are automatically handled in the CoreFlow2 ASICs without any further processing. In this way the Enterasys S-Series is able to apply a very granular level of control to each flow at full line rate.

I/O Module Specification

S130 Class Fabric Modules		S180 Class I/O Fabric Modules					
	Wiring Closet, Distribution Layer, Small Network Core	Distribution Layer, Server Aggregation, Data Center Core, Enterprise					
Part Number	ST4106-0348-F6	ST8206-0848-F8	SG8201-0848-F8	SK8008-1224-F8	SK8208-0808-F8	SK8009-1224-F8	SL8013-1206-F8

System Summary

Enterasys S-Series I/O modules are high performance, fully-featured switch routers that deliver a fully distributed switching system as well as management and route processing capabilities, where each module is individually driven and managed by on-board processors. Enterasys CoreFlow2 ASICs, together with firmware microprocessors, create a traffic control solution that delivers high performance and flexibility. This distributed ASIC-based architecture increases processing power as modules are added for a higher level of scalability and flexibility.

I/O fabrics and I/O modules are available with a wide array of interface types and port densities (10/100/1000BASE-TX, 1000BASE SFP, 10GBASE SFP+, 10GBASE-T and 40GBASE QSFP+) to address varied network requirements. All triple speed copper I/O modules are PoE-enabled. A number of I/O modules also include either one or two option-module slots; an option-module slot provides additional media and port speed connectivity via triple speed copper, Gigabit SFP, 10 Gigabit SFP+ or a combination of gigabit and SFP+ Ethernet ports. This further simplifies network design and reduces the cost of network deployments. All S-Series I/O Fabrics and I/O Modules include deep packet buffers per port to avoid dropped packets in the event of network congestion.

All S-Series 10 Gigabit SFP+ ports are dual speed and will also accept standard Gigabit SFP transceivers. This capability enables a

smooth migration path from Gigabit Ethernet for connecting devices to 10 Gigabit Ethernet in the future. Customers can use Gigabit Ethernet optical uplinks today and migrate to 10 Gigabit at their own pace. In addition, all Gigabit SFP ports will accept Fast Ethernet 100BASE-FX/TX SFPs to enable connection of legacy devices.

S180 Class I/O and I/O Fabric Modules

The S180 class is designed to support the most demanding areas of the network where sustained high volumes of traffic are most common. Both 10 Gigabit and 40 Gigabit Ethernet modules incorporate advanced traffic management mechanisms and large packet buffers to ensure optimal network performance, predictability and reliability. The S180 Class is optimized for 10Gb and 40Gb Ethernet aggregation and the rigorous requirements of enterprise network core and data center. These modules support the full range of Enterasys OneFabric, CoreFlow2 features and advanced switching and routing without the need for additional licensing. The S180 class includes support for Virtual Switch Bonding via dedicated VSB SFP+ ports, which simplifies network virtualization functionality for the S-Series product lines. Dedicated VSB ports and support for Data Center Bridging protocols enable scalable virtual services in a data center environment.

S140 Class I/O Modules

The S140 class delivers a high performance, mid-tier switching solution that provides increased density and a lower-cost alternative in 10G aggregation scenarios. These modules offer the option for a high density, fabric-less aggregation solution by deploying gigabit and 10 Gigabit aggregation in the S3 chassis. The S140 class also provides high performance SFP and triple-speed with media flexibility and support for IEEE 802.3af PoE and IEEE 802.3at high power PoE standards. The S140 modules provide the gigabit aggregation connectivity for the S180 class chassis configurations. Dedicated VSB ports via Option Module and support for Data Center Bridging protocols enable scalable virtual services in a data center environment.

S130 Class I/O Modules

S130 class I/O modules are optimized for use in wiring closets for user connectivity, in the distribution layer to aggregate edge switches and in small and medium network cores. These modules provide high density with media flexibility and support for IEEE 802.3af PoE and IEEE 802.3at high power PoE standards. S130 class I/O modules deliver scalable triple speed performance and flexibility to ensure compatibility with today's high performance workstations, as well as legacy devices, while providing the highest levels of QoS, security, and bandwidth control via flow-based switching.

S130 class I/O modules include a unique feature that enables full line rate forwarding for bandwidth hungry workstations or when downstream switches are connected. Flex-Edge technology provides line rate

forwarding through the switch even when the systems uplinks are in an oversubscribed state. This ensures that critical and time sensitive data passes through the switch to its destination at line rate, unlike inefficient methods used by other solutions on the market.

S130 class I/O modules support up to 512 users with up to eight authenticated users per port in contrast to S140/S180 class modules which support up to 1,024 users/devices per module with no restriction to the number of users per port. In cases where an S130 class I/O module needs to support more than 8 authenticated users per port, a software upgrade license may be purchased and applied to the module that enables this capability. The S-EOS-PPC license is required for each S130 class I/O module that requires 8 users per port restriction removed. Only one S-EOS-PPC license is required for the S130 class SSA switch.

Performance/Capacity

Switching Fabric Bandwidth	VLANs Supported	Packet Buffering
2560 Gbps Load Sharing Fabric Pair	4094	Chassis Buffer Size (Max.)
Switching Throughput 1920 Mpps (Measured in 64-byte packets)	Transmit Queues 12 for S130, SSA130/SSA150 16 for S180/S140, SSA180	S1 3 GB S3 6 GB S4 12 GB S6 18 GB S8 24 GB
IPv4/IPv6 Routing Throughput 1920 Mpps (Measured in 64-byte packets) (Capacities above are for an S8 System)	Classification Rules 57K per chassis	SSA130 Class 1.0 GB SSA150/180 Class 1.5 GB
Address Table Size 128K MAC Addresses	Main Memory S130, SSA130: 1 GB Per Module S140/S180, SSA180/SSA150A: 2 GB Per Module Flash Memory: 1 GB Per Module	(Actual chassis buffering capacity is dependent on the modules classes installed)

High Availability HW Features

The S-Series includes many standard high availability features. These hardware-based features allow the S-Series to be deployed in mission critical environments that require 24/7 availability.

High Availability Summary:

- Passive chassis backplanes S1A, S3, S4, S6, S8 chassis
- Meshed backplane architecture in the S3 chassis
- Hot swappable fan trays with multiple cooling fans
- Separate system and PoE power supplies
- Hot swappable power supplies
- Multiple AC input connections for power circuit redundancy
- Load sharing/redundant I/O fabrics S4, S6, and S8 chassis
- N+1 fabric redundancy in the S8 and S6 chassis
- Hot swappable I/O fabrics and I/O modules
- Multiple host CPU for N+X redundancy
- Virtual Switch Bonding

Feature-Rich Functionality

Examples of additional functionality and features that are supported in the Enterasys S-Series.

Features Summary:

- Multi-user, Multi-method Authentication and Policy per port
- Line Rate, non-sampled Netflow (v5/v9)
- Server Load Balancing (LSNAT)
- Network Address Translation (NAT)
- Generic Route Encapsulation (GRE)
- Flow Setup Throttling (FST)
- Flex-Edge Technology
- High Availability Firmware Upgrades (HAU)
- Anti-Spoofing Protection and User tracking
- Virtual Private Port Service (GRE with Layer 2)
- Fabric Routing with IP Host Mobility
- Application Policy Controls (Bonjour, uPNP)
- Remote Port and Flow Mirrors
- Policy driven mirrors
- Layer 2 MAC Access Control Lists
- RADIUS Server Load Balancing
- DHCP Server (IPv4/IPv6)
- IPSLA

Features/Standards and Protocols

Switching/VLAN Services

Generic VLAN Registration Protocol (GVRP)
802.1ab LLDP-MED
802.1ad Provider Bridges
802.1ag Connectivity Fault Management (CFM)
802.1ak Multiple VLAN Registration Protocol (MVRP)
802.1aq (SPB) Shortest Path Bridging (Ready)
802.1ax-2008 / 802.3ad Link Aggregation

- up to 64 groups with up to 8 ports in a group

802.1d MAC Bridges
802.1q VLANs
802.1s Multiple Spanning Tree
802.1t Path Cost Amendment to 802.1D
802.1w Rapid re-convergence of Spanning Tree
802.3 2008 Clause 57 (Ethernet OAM – Link Layer OAM)
802.3ab Gigabit Ethernet (copper)
802.3ae 10 Gigabit Ethernet (fiber)
802.3an 10GBASE-T (copper)
802.3u Fast Ethernet
802.3x Flow Control
802.3z Gigabit Ethernet (fiber)
IP Multicast (IGMPv1,v2,v 3)
IGMP v1/v2/v3 Snooping and Querier
Jumbo Packet with MTU Discovery Support for Gigabit (9216 bytes)
Link Flap Detection
Dynamic Egress (Automated VLAN Port Configuration)
Data Center Bridging

- 802.1Qaz
- ETS (Enhanced Transmission Selection)
- DCBx (Data Center Bridge Exchange Protocol)
- 802.1Qbb PFC (Priority Flow Control)

- 802.1Qau Congestion Notification

MLD IPv6 Snooping and Querier

Virtual Switch Bonding (VSB)

Anti-Spoofing Suite

- DHCP Snooping

- Dynamic Arp Inspection (DAI)

- IP Source Guard

IP/Routing Features

Static Routes
Standard ACLs
OSPF with Multipath Support
OSPF Passive Interfaces
IPv6 Routing Protocol
Extended ACLs
Policy-based Routing
NAT Network Address Translation
TWCB Transparent Web Cache Redirect

Network Security and Policy Management

802.1X Port-based Authentication
Web-based Authentication
MAC-based Authentication
Convergence Endpoint Discovery with Dynamic Policy Mapping
(Siemens HFA, Cisco VoIP, H.323, and SIP)
Multiple Authentication Types per Port Simultaneously
Multiple Authenticated users per Port with unique policies per user/End System (VLAN association independent)
RFC 3580 IEEE 802.1 RADIUS Usage Guidelines, with VLAN to Policy Mapping
Worm Prevention (Flow Set-Up Throttling)
Broadcast Suppression
ARP Storm Prevention
MAC-to-Port Locking
Span Guard (Spanning Tree Protection)
Stateful Intrusion Detection System Load Balancing
Stateful Intrusion Prevention System and Firewall Load Balancing
Behavioral Anomaly Detection/Flow Collector (non-sampled Netflow)
Static Multicast Group Provisioning
Multicast Group, Sender and Receiver Policy Control
Enterasys Private VLANs

Class of Service

Strict Priority Queuing
Weighted Fair Queuing with Shaping
Hybrid Arbitration
16/12 Transmit Queues per Port
Up to 3,072 rate limiters for S130 Class products
Up to 12,288 rate limiters for S180 Class products
Packet Count or Bandwidth based Rate Limiters.
(BandwidthThresholds between 8 Kbps and 4 Gbps)
IP ToS/DSCP Marking/Remark
802.1D Priority-to-Transmit Queue Mapping

Enterasys Network Management Suite (NMS)

NetSight Base
NetSight
NetSight Advanced
Data Center Manager

Network Management

SNMP v1/v2c/v3
Web-based Management Interface
Industry Common Command Line Interface
Multiple Software Image Support with Revision Roll Back
Multi-configuration File Support
Editable Text-based Configuration File
COM Port Boot Prom and Image Download via ZMODEM
Telnet Server and Client
Secure Shell (SSHv2) Server and Client
Cabletron Discovery Protocol
Cisco Discovery Protocol v1/v2
Syslog
FTP Client
Simple Network Time Protocol (SNTP)
Netflow version 5 and version 9

Specifications

Physical Specifications		
Model Number	Dimensions (H x W x D)	Rack Units
S8-Chassis	63.96 cm x 44.70 cm x 47.32 cm (25.19" x 17.60" x 18.63")	14.5U
S8-Chassis-POE4	72.87 cm x 44.70 cm x 47.32 cm (28.69" x 17.60" x 18.63")	16.5U
S8-Chassis-POE8	77.31 cm x 44.70 cm x 47.32 cm (30.44" x 17.60" x 18.63")	17.5U
S6-Chassis	88.70 cm x 44.70 cm x 47.35 cm (34.92" x 17.59" x 18.64")	20U
S6-Chassis-POE4	97.50 cm x 44.70 cm x 47.35 cm (38.39" x 17.59" x 18.64")	22U
S4-Chassis	40.00 cm x 44.70 cm x 47.32 cm (15.75" x 17.60" x 18.63")	9U
S4-Chassis-POE4	48.90 cm x 44.70 cm x 47.32 cm (19.25" x 17.60" x 18.63")	11U
S3-Chassis-A	31.11 cm x 44.70 cm x 47.32 cm (12.25" x 17.60" x 18.63")	7U
S3-Chassis-POEA	37.46 cm x 44.70 cm x 47.32 cm (14.75" x 17.60" x 18.63")	9U
S1-Chassis-A	8.69 cm x 44.88 cm x 60.27 cm (3.42" x 17.67" x 23.73")	2U
SSA S130 and S150A (S-Series Stand Alone)	4.44 cm x 44.70 cm x 59.43 cm (1.75" x 17.60" x 23.40")	1U
SSA S180 (S-Series Stand Alone)	4.37cm x 44.73 cm x 57.30 cm (1.72" x 17.61" x 22.55")	1U

Power Supplies					
Model number	Current Rating	Input Voltage	Input Frequency	Power Output	
				(100-120v)	(208-240v)
S-AC-PS	20A	100 - 240 VAC	50 - 60 Hz	1,200W	1,600W
S-AC-PS-15A	15A	100 - 240 VAC	50 - 60 Hz	930W	1,600W
S-DC-PS		48-60 V DC		1200W	
SSA-FB-AC-PS-A (I/O Exhaust)	15A	100 - 240 VAC	50 - 60 Hz	480W	
SSA-FB-AC-PS-B (I/O Intake)	15A	100 - 240 VAC	50 - 60 Hz	480W	
SSA-PS-625	15A	100 - 240 VAC	50 - 60 Hz	625W	625W
SSA-PS-1000W	15A	100 - 240 VAC	50 - 60 Hz	1,000W	1,200W

Specifications

POE Power (802.3af, 802.3at)					
S-POE-PS	20A	100 - 240 VAC	50 - 60 Hz	1,200W	2,000W
4 Bay POE Power				4,800W (max)	8,000W (max)
8 Bay POE Power				9,600W (max)	16,000W (max)
Environmental					
Operating Temperature	5° to 40° C (41° to 104° F)				
Storage Temperature	-30° to 73° C (-22° to 164° F)				
Operating Relative Humidity	5% to 95% (non-condensing)				
Agency Specifications					
Safety	UL 60950-1, FDA 21 CFR 1040.10 and 1040.11, CAN/CSA C22.2, No. 60950-1, EN 60950-1, EN 60825-1, EN 60825-2, IEC 60950-1, 2006/95/EC (Low Voltage Directive)				
Electromagnetic Compatibility	FCC 47 CFR Part 15 (Class A), ICES-003 (Class A), EN 55022 (Class A), EN 55024, EN 61000-3-2, EN 61000-3-3, AS/NZ CISPR-22 (Class A). VCCI V-3. CNS 13438 (BSMI), 2004/108/EC (EMC Directive)				
Environmental	2002/95/EC (RoHS Directive), 2002/96/EC (WEEE Directive), Ministry of Information Order #39 (China RoHS)				

Chassis Model Number Information

Part Number	Description
S8 Chassis	
S8-Chassis	S-Series S8 Chassis and fan trays (Power supplies ordered separately)
S8-Chassis-POE4	S-Series S8 Chassis and fan trays with 4 bay PoE subsystem (System and PoE Power supplies ordered separately)
S8-Chassis-POE8	S-Series S8 Chassis and fan trays with 8 bay PoE subsystem (System and PoE Power supplies ordered separately)
S8-POE-8BAY-UGK	S-Series 8 bay PoE upgrade kit for the S8 (PoE Power supplies ordered separately)
S8-POE-4BAY-UGK	S-Series 4 bay PoE upgrade kit for the S8 (PoE Power supplies ordered separately)
S8-Midmount-Kit	S-Series S8 Chassis 19" midmount installation rack kit can be used with all S8 chassis types
S6 Chassis	
S6-Chassis	S-Series S6 Chassis and fan trays. Front to back cooling. (Power supplies ordered separately)
S6-Chassis-POE4	S-Series S6 Chassis and fan tray with 4 bay POE subsystem. Front to back cooling. (System and POE power supplies ordered separately)
S6-Midmount-Kit	S-Series S6 Chassis 19" midmount installation rack kit, can be used with all S6 Chassis types
S6-FAN	S-Series Fan Tray (For use w/ S6)
S4 Chassis	
S4-Chassis	S-Series S4 Chassis and fan tray (Power supplies added separately)
S4-Chassis-POE4	S-Series S4 Chassis and fan tray with 4 bay PoE subsystem (System and PoE Power supplies ordered separately)
S4-POE-4BAY-UGK	S-Series 4 bay PoE upgrade kit for the S4 (PoE Power supplies ordered separately)
S4-Midmount-Kit	S-Series S4 Chassis 19" midmount installation rack kit, can be used with all S4 Chassis types
S3 Chassis	
S3-Chassis-A	S-Series S3 Chassis and fan tray (Power supplies ordered separately)
S3-Chassis-POEA	S-Series S3 Chassis and Fan Tray with 4 bay PoE subsystem (System and PoE Power supplies ordered separately)
S3-POE-4BAY-UGK	S-Series 4 bay PoE upgrade kit for the S3 (PoE Power supplies ordered separately)
S3-Midmount-Kit	S-Series S3 Chassis 19" midmount installation rack kit, can be used with all S3 Chassis types
S1-Chassis	
S1-Chassis-A	S-Series S1 Chassis and fan tray. Compatible with Fabric Modules only. (SSA 1000W Power supplies ordered separately)
S1-Mount-Kit	S-Series S1 Chassis 19" accessory mounting kit. Supports midmount and rail kit installation options for 2 and 4 post racks, can be used with the S1 chassis.
S1-FAN-A	S1 Chassis fan tray, Spare (For use w/S1)

Chassis Model Number Information

Part Number	Description
Power Supplies and Fans	
S-AC-PS	S-Series AC power supply, 20A 100-240 VAC input (1200W/1600W) (For use w/S3/S4/S6/S8)
S-AC-PS-15A	S-Series AC power supply, 15A, 100-240 VAC input, (930W/1600W) (For use w/S3/S4/S6/S8)
S-POE-PS	S-Series POE power supply, 20A, 100-240 VAC input, (1200/2000 W) (For Use in 4/8 Bay PoE power subsystems)
S-DC-PS	S-Series 48-60v DC Power Supply (For Use w/ S3/S4/S6/S8) (1200W)
S-FAN	S-Series Fan Tray (For use w/ S3/S4/S8)

I/O and I/O Fabric Model Number Information

Part Number	Description
S130 I/O Fabric Modules	
ST4106-0348-F6	S-Series S130 Class I/O - Fabric Class Module, 1280Gpbs Load Sharing - 48Ports 10/100/1000Base-TX via RJ45 with PoE (802.3at) and one Type2 option slot (Used in S1A/S4/S6/S8)
S130 I/O Modules	
ST4106-0248	S-Series S130 Class I/O Module - 48 Ports 10/100/1000BASE-T via RJ45 with PoE (802.3at) and one Type1 option slot (Used in S3/S4/S6/S8)
SG4101-0248	S-Series S130 Class I/O Module - 48 Ports 1000BASE-X ports via SFP and one Type1 option slot (Used in S3/S4/S6/S8)
S140 I/O Modules	
ST2206-0848	S-Series S140 Class I/O Module - 48 Ports 10/100/1000BASE-TX via RJ45 with PoE (802.3at) and two Type2 option slot (Used in S3/S4/S6/S8)
SG2201-0848	S-Series S140 Class I/O Module - 48 Ports 1000BASE-X ports via SFP and two Type2 option slot (Used in S3/S4/S6/S8)
SK2008-0832	S-Series S140 Class I/O Module - 32 Ports 10GBASE-X via SFP+ (Used in S3/S4/S6/S8)
SK2009-0824	S-Series S140 Class I/O Module -24 Ports 10GBASE-T via RJ45 (Used in S3/S4/S6/S8)
S180 I/O Fabric Modules	
SL8013-1206-F8	S-Series S180 Class I/O - Fabric Module, Load Sharing - 6 Ports 40GBASE-X Ethernet via QSFP, 4 ports VSB via SFP+ (Used in S1A/S4/S6/S8)
SK8008-1224-F8	S-Series S180 Class I/O - Fabric Module, Load Sharing - 24 Ports 10GBASE-X via SFP+, 4 ports VSB via SFP+ (Used in S1A/S4/S6/S8)
SK8208-0808-F8	S-Series S180 Class I/O - Fabric Module, Load Sharing - 8 Ports 10GBASE-X via SFP+ and two Type2 option slots (Used in S1A/S4/S6/S8)
SK8009-1224-F8	S-Series S180 Class I/O - Fabric Module, Load Sharing - 24 Ports 10GBASE-T via RJ45, 4 ports VSB via SFP+ (Used in S1A/S4/S6/S8)
ST8206-0848-F8	S-Series S180 Class I/O - Fabric Module, Load Sharing - 48 Ports 10/100/1000BASE-T via RJ45 with PoE (802.3at) and two Type2 option slots (Used in S1A/S4/S6/S8)
SG8201-0848-F8	S-Series S180 Class I/O - Fabric Module, Load Sharing - 48 Ports 1000BASE-X via SFP and two Type2 options slots (Used in S1A/S4/S6/S8)
S180 I/O Modules	
SL8013-1206	S-Series S180 Class I/O Module - 6 Ports 40GBASE-X Ethernet via QSFP, VSB expansion slot (Used in S4/S6/S8)
SK8008-1224	S-Series S180 Class I/O Module - 24 Ports 10GBASE-X via SFP+, VSB expansion slot (Used in S4/S6/S8)
SK8009-1224	S-Series S180 Class I/O Module - 24 Ports 10GBASE-T via RJ45, VSB expansion slot (Used in S4/S6/S8)
Option Modules	
SOK2208-0102	S-Series Option Module (Type1) - 2 Ports 10GBASE-X Ethernet ports via SFP+ (Compatible with Type1 & Type2 option slots)
SOK2208-0104	S-Series Option Module (Type1) - 4 Ports 10GBASE-X Ethernet ports via SFP+ (Compatible with Type1 & Type2 option slots)
SOK2208-0204	S-Series Option Module (Type2) - 4 10GBASE-X Ethernet ports via SFP+ (Compatible with Type2 option slots)
SOG2201-0112	S-Series Option Module (Type1) - 12 1000BASE-X ports via SFP (Compatible with Type1 & Type2 option slots)
SOT2206-0112	S-Series Option Module (Type1) - 12 Ports 10/100/1000BASE-TX via RJ45 with PoE (802.3at) (Compatible with Type1 & Type2 option slots)
SOTK2268-0212	S-Series Option Module (Type2) - 10 Ports 10/100/1000BASE-T via RJ45 with PoE and 2 ports 10GBASE-X via SFP+ (Compatible with Type2 option slots)
SOGK2218-0212	S-Series Option Module (Type2) - 10 Ports 1000BASE-X via SFP and 2 ports 10GBASE-X via SFP+ (Compatible with Type2 option slots)
SOV3208-0202	S-Series Option Module (Type2) - 2 Port VSB Option Module (Compatible with Type2 option slots on S140/S180 modules only)
Expansion Module	
SOV3008-0404	S-Series VSB Expansion Module - 4 Port VSB Module (Compatible with S180 Class 10Gb/40Gb I/O modules only)

SSA and License Model Number Information

Part Number	Description
SSA S130/S150A (S-Series Stand Alone)	
SSA-T4068-0252	S-Series S130 Class Stand Alone (SSA) - 48 Ports 10/100/1000BASE-T via RJ45 with PoE (802.3at) and 4 10GBASE-X Ethernet ports via SFP+ (Power supplies not included - Please order separately)
SSA-T1068-0652A	S-Series S150 Class Stand Alone (SSA) - S150 Class - 48 Ports 10/100/1000BASE-T via RJ45 with PoE (802.3at) and 4 10GBASE-X Ethernet ports via SFP+ (Power supplies not included - Please order separately)
SSA-AC-PS-625W	S-Series Standalone (SSA S130 and S150 Class) - AC power supply, 15A, 100-240VAC input, (625W)
SSA-AC-PS-1000W	S-Series Standalone (SSA S130 and S150 Class) and S1-Chassis - AC and POE power supply, 15A, 110-240VAC input, (1000/1200W)
SSA-FAN-KIT	S-Series Stand Alone (SSA S130 and S150 Class) - Replacement fan assembly (Single Fan)
SSA S180 (S-Series Stand Alone)	
SSA-T8028-0652	S-Series S180 Class Standalone (SSA) - 48 Ports 10/100/1000BASE-T via RJ45 and 4 ports 10GBASE-X via SFP+, Front to Back cooling (Power supplies not included - Please order separately)
SSA-G8018-0652	S-Series S180 Class Standalone (SSA) - 48 Ports 1000BASE-X via SFP and 4 ports 10GBASE-X via SFP+, Front to Back cooling (Power supplies not included - Please order separately)
SSA-FB-MOUNTKIT	Optional Rack Mount Kit for the SSA 'Front to Back' models.
SSA-FB-AC-PS-A	S-Series Standalone (SSA Front to Back) - AC power supply, 15A, 100-240VAC input, I/O side exhaust
SSA-FB-AC-PS-B	S-Series Standalone (SSA Front to Back) - AC power supply, 15A, 100-240VAC input, I/O side intake
SSA-FB-FAN	S-Series Standalone (SSA Front to Back) - Spare fan tray assembly
Optional Licenses	
S-EOS-L3-S130	S-Series Advanced Routing License (For use on S130 Class Modules) (Enables VRF, BGP, Tunneling)
S-EOS-PPC	S-Series Per Port User Capacity License Upgrade (For use on S130 Class Modules)
S-EOS-VSB	S-Series Multi-slot Virtual Switch Bonding License Upgrade (For use on S130/S140/S150 Class Modules)
SSA-EOS-VSB	S-Series SSA Virtual Switch Bonding License Upgrade (For use on SSA Only)
SSA-EOS-2XUSER	SSA180/SSA150 double user capacity license
S1-EOS-VSB	S-Series S1 Chassis Virtual Switch Bonding License Upgrade (For use on S1-Chassis-A /S1-Chassis Only)

Transceivers

Enterasys transceivers provide flexible connectivity options for Ethernet. All Enterasys transceivers meet the highest quality for extended life cycle and the best possible return on investment. For detailed specifications, compatibility and ordering information please go to <http://www.enterasys.com/products/transceivers-ds.pdf>.

Warranty

The Enterasys S-Series comes with a one year hardware warranty. For full warranty terms and conditions please go to <http://www.enterasys.com/support/warranty.aspx>

Service and Support

Enterasys Networks provides comprehensive service offerings that range from Professional Services to design, deploy and optimize customer networks, customized technical training, to service and support tailored to individual customer needs. Please contact your Enterasys account executive for more information about Enterasys Service and Support.

Additional Details
